MICRO CONVERSION KIT

INFORMATION

Micro Conversion Kits® are lightweight and sturdy platform for handguns, turning them into the ultimate Conversion Kit. With a *barrel shroud* made of aluminum with a *polymer body*.

The extended stabilizer, which now comes standard, enables one-handed firing for better shooting performance. MCK is the most cost effect conversion kit in the world. Fastest assembly/disassembly conversion kit on the market.

Improving accuracy dramatically up to 200 yards.

MCK comes in two versions, one is a **NON-NFA product** (with standard long stabilizer brace), and the other is a **NFA product (with stock)**.

TOP FEATURES

- ❶ No pistol disassembly required – Just place pistol into the kit, lock, and go
- ❷ Allows for multiple handgun models into one platform
- ❸ Ergonomic Finger Groove Grip for more stability
- ❹ Top Picatinny rail, allowing a combination of sights and/or optics
- ❺ Side Picatinny rails for mounting additional accessories, i.e... thumb-rests
- ❻ Ambidextrous fast and easy handling
- ❼ Right-folding stock arm brace for easy concealment and carry, locks in the folded position
- ❽ Front spare magazine holder for a faster reload
- ❾ Built-in charging handle allowing for quicker assembly/disassembly
- ❿ Exposed slide release for direct contact and easier use

Micro Conversion Kits® GEN 2

The extended stabilizer enables one-handed firing for better shooting performance. MCK Gen 2 is the most cost effective conversion kit in the world. Fastest assembly/disassembly conversion kit on the market. Improving accuracy dramatically up to 200 yards.

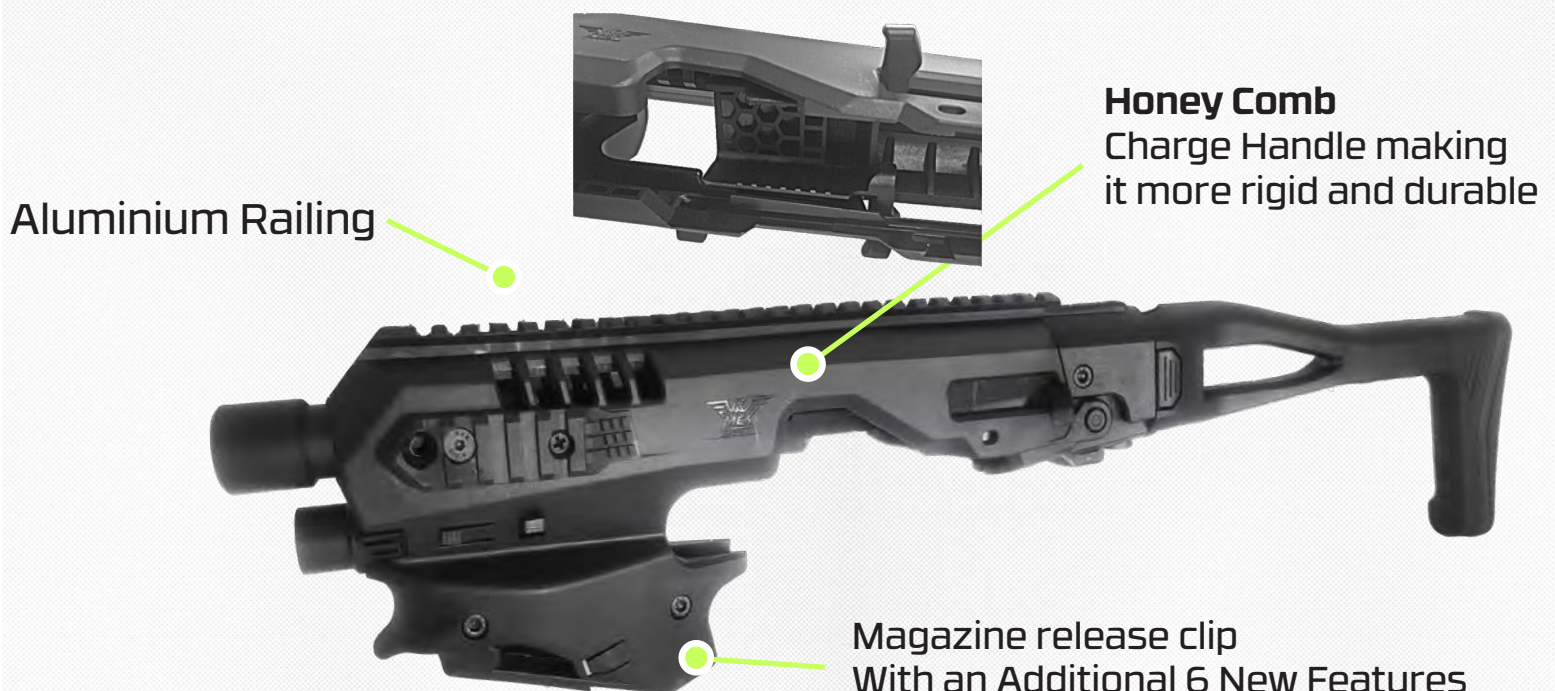

GEN 2 UPGRADES

- SUPPRESSOR/COMPENSATOR READY
- No pistol disassembly required – Just place pistol into the kit, lock, and go
- Allows for multiple handgun models into one platform
- Ergonomic Finger Groove Grip for more stability
- Top aluminum Picatinny rail, allowing a combination of sights and/or optics
Side Picatinny rails for mounting additional accessories, i.e. thumb-rests.
- Ambidextrous fast and easy handling.

TOP FEATURES

- 1 Features a new extended stabilizer which allows the user to fire the GEN2 MCK in the folded and locked position. The new stabilizer is compatible with Gen 1 MCKs as well.
- 2 Rear door extends back an additional 15 degrees, making it easier to insert and extract the handgun.
- 3 Accommodates suppressor height sights.
- 4 Features a new charging handle which makes more surface contact with the rear of the handgun slide.
- 5 Features an aluminum top picatinny rail for improved stability, durability, and accuracy.
- 6 Accepts CAA USA's new brass catcher, made especially for our latest generation MCK. (Sold separately)
- 7 Features an improved spare mag. holder that operates with a mag catch & magazine release button.
- 8 The Gen 2 MCK is suppressor friendly and can accommodate a suppressor up to 1.38" diameter

GEN 2

CANIK

SUPERIOR FIREARMS

GEN 3

The **MCK GEN 3** is the next generation in conversion kits implementing the feedback from you and loyal customers, while keeping the great features of the **GEN 1 & GEN 2**. The Aim to make The MCK Even better will always be the goal of CAA USA. With the ability to use your slide-mounted optic as well as an Ambidextrous folding brace/stock along with an internal cleaning system for carbon build-up (Slide as well as MCK)

FEATURES

- **AMBIDEXTROUS FOLDING BRACE/STOCK**
- **Internal Cleaning System for Carbon Build-up**

GEN 3 ADVANTAGES

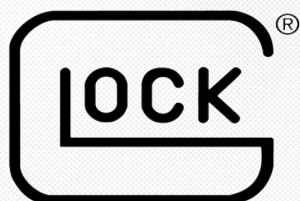

1. Can for the first time assemble your slide-mounted optic into the MCK
2. Not only does the slide-mounted optic fit into the MCK, you can also aim with your Zeroed RMR while using the MCK GEN 3. Thus saving the need for a top-rail mount red dot sight.
3. MCK GEN 3 Stabilizer has 2 height positions. You can move the stabilizer to the lower position when shooting with an RMR/Slide mounted optic or in the upper position when using a Red Dot Sight on the Top Picatinny Rails.
4. With built-in handgun cleaning system, utilizing a brush/bristle system. The Robust Bristles clean the sides of the slide during cycling.
5. Front Adaptor Shields inside of the MCK from carbon buildup and is easily removed and washable. Making the cleaning of the MCK easier than ever before. Simply remove and rinse.
6. Featuring a new metal charging handle system that uses a back plate adaptor to accommodate an RMR/Slide mounted optic and an upgraded polymer charging handle that allows a standard firearm to be used as well. You can if you so choose rack the slide with your optic without the need for a charging handle.
7. Comes with a new Ambidextrous folding stabilizer/stock option.
8. Accommodates up to 1.56" Diameter suppressors (used to be 1.38")
9. Removeable 4.6" Top Front and Rear Picatinny Rails. An additional Top Rail for use while a suppressor is attached and you want to use a front sight pop-up
10. A place on the Stabilizer to store the charging handle when not in use.
11. An upgraded box with a perforated lid allowing you to store and transport your MCK GEN 3 in the folded position when assembled.
